

Centrifuge Systems, Inc. – Web Developer

Centrifuge Systems, Inc., a venture-backed software company in McLean, VA, seeks a Web Developer to join its rapidly growing team.

Centrifuge Systems is a leading provider of next generation business intelligence software that helps organizations discover insights, patterns and relationships hidden in their data. The unique Centrifuge approach allows users to ask open-ended questions of their data by interacting with visual representations of the data directly.

Centrifuge is used in some of the most demanding applications in the world, including counter-terrorism and homeland defense, to help analysts move from data to discovery.

Position Overview: The Web Developer is responsible for designing and implementing tools and features to enrich the user interface and user experience of the Centrifuge Server product suite. The Web Developer often works independently but also collaborates with the Chief Architect and other engineers to complete projects in a timely manner.

Job responsibilities include but are not limited to:

- Designing and developing products, tools, and features for the Centrifuge Server product suite
- Developing features to enhance the user interface and user experience of Centrifuge Server
- Working with CTO, Chief Architect, and others to help shape product vision
- Providing practical support to groups within the company

Qualifications:

- Advanced knowledge of and demonstrated experience with front end web technologies such as Adobe Flash/Flex, JavaScript, DHTML, and CSS
- Demonstrated experience with Ajax programming
- Familiarity with various JavaScript frameworks and effects libraries
- Advanced knowledge of and demonstrated experience with XML
- Demonstrated organization and communications skills

Additional requirements:

- US Citizenship
- College degree preferred

Please send qualified resumes to careers@centrifugesystems.com.
