Centrifuge Systems, Inc. – Senior Consulting Engineer

Centrifuge Systems, Inc., a venture-backed software company in McLean, VA, seeks a Senior Consulting Engineer to join its rapidly growing team.

Centrifuge Systems is a leading provider of next generation business intelligence software. Our groundbreaking approach, called Interactive Analytics (IA), brings together three modern innovations in analysis: Interactive Data Visualization, Unified Data Views, and Collaborative Analysis. Through the convenience of your browser, you can connect to data, explore it, and collaborate with others.

Born out of the US Intelligence Community, Interactive Analytics is being applied to national security problem domains such as homeland defense and cyber crime, and it has recently been introduced into the commercial business intelligence market. This technology helps organizations of every kind understand and reveal key non-obvious relationships in their data.

Position Overview: The Senior Consulting Engineer is responsible for designing, developing and delivering customer specific requirements for the Centrifuge product suite. The role will include significant customer interaction at the customer worksite, and it will interface extensively with Centrifuge's sales, product management and engineering staff to complete projects in a timely and high quality manner.

Job responsibilities include but are not limited to:

- Implementation, integration and customization of the Centrifuge product suite
- Customer support, both in field and via phone and email
- Working with sales operations, product management, and engineering to help shape product requirements based on customer feedback
- Providing engineering and advanced technical support and training to customers and groups inside the organization
- Work closely with the Centrifuge Sales team to generate new opportunities and to provide solutions in existing major accounts
- Work "one on one" with analysts and other end users to assist them in deriving maximum value from Centrifuge products

Qualifications and Requirements:

- Superb communication and presentation skills, including outstanding product demonstration skills
- Demonstrated experience with Java programming
- Advanced knowledge of and demonstrated experience with front end web technologies such as Adobe Flash/Flex, JavaScript, DHTML, and CSS
- Strong working knowledge of RDMS systems such as Oracle, PostgreSQL and MS SQL Server
- Strong working knowledge of Windows and Linux operating systems
- US Citizenship
- US Government TS/SCI Security Clearance
- College degree

Please send qualified resumes to careers@centrifugesystems.com.
